

ACCESSORIES

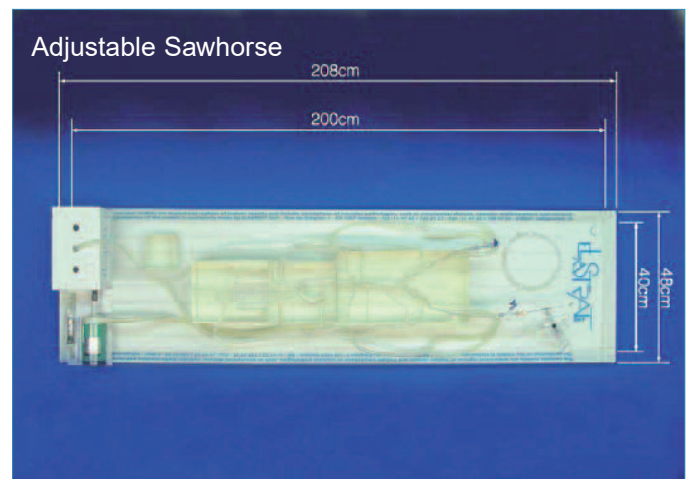

WORK-TRAY AND SAWHORSES

Our work-tray in polyethylene has been designed to be compatible with all vascular models displayed in this catalogue.

Adjustable Sawhorse

Adjustable Sawhorse

Adjustable sawhorses.  
In height: from 77cm to 95cm (30" to 37.4"). In width: from 75cm to 120cm (29.5" to 47.2").

ELASTRAT replicas are compatible with modern imaging modalities such as digital subtraction angiography, computed tomography and magnetic resonance imaging. Providing the use of an adequate circulating fluid, Doppler techniques can also be performed. The in vitro models transparency to light makes them suitable for video and photographic monitoring.
